

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

THE PREFACE.

THE Papers contained in this volume will be found to illustrate various matters connected with the state of Scotland in the fifteenth and sixteenth centuries. To the antiquary they will furnish many curious and probably unexpected details; and when rightly understood, they may perhaps throw some light on the progress of manners and the arts, during a period of which the domestic history is still very obscure and imperfect.

NOTHING more has been here attempted than to give a text scrupulously faithful to the original authorities. It is a text, however, the meaning and value of which will be often imperfectly comprehended by an ordinary reader, without the aid of commentary and illustration. The frequent obscurities which it presents, and the many forgotten words and phrases which it serves to record, would be of themselves enough to expose the scantiness of our present knowledge of the condition, manners, and habits of our ancestors, at no very remote period.

WHILE these pages afford a display of the establishments of the Scottish Court, sufficient to correct the false representations of national poverty and meanness, into which some intelligent writers have been betrayed by the want of authentic evidence on the subject, they will at the same time furnish some amusing glimpses of the interior nakedness of those domestic arrangements, where a certain barbaric splendour was aimed at, but accompanied, it should seem, by few of those conveniencies or luxuries which are regarded as constituting the most indispensable acquisitions of modern opulence and refinement.

THE whole of the articles contained in this Collection have been taken from the Public Records of the Kingdom; excepting N° VI. and N° VIII., taken from originals in the private archives of the noble families to whom they respectively relate.

II. INSTRUMENT UPON LODGING THE REGALIA IN THE
CASTLE OF EDINBURGH.—26 MARCH 1707.

AT THE CASTLE of Edinburgh and within the Crown rounge there betwixt the hours of one and two afternoon of the twenty fixth day of March in the one thousand fevin hundreth and feventh year of our Lord and fixth year of the reign of her Majesty Anne by the grace of God Queen of Scotland England France and Ireland Defender of the Faith.

THE WHICH DAY in prefence of us notarys publick and witnesses under subscribing COMPEARED perfonally William Wilfon one of the under clerks of Seffion Depute Marifchal for himfelf as procurator for and in name and behalf of WILLIAM EARL MARISCHAL lord Keith and Altrie &c. great Marifchall of the Kingdom of SCOTLAND heritable keeper of the Regalia thereof viz. Crown Sceptre and Sword And there in prefence of David Earl of Glaſgow lord Boyle &c. Lord Thefaurer depute Who for himfelf and in name of the remanent Lords Commiffioners of the Thefaury was prefent to receive the above regalia. The ſaid William Wilfon after producing and reading a procuratory granted by the ſaid Noble Earl to him of the contents therein and after-

mentioned dated and regiftred in the books of Council and Seflion on the twenty fifth day of March instant DID also produce to the faid Lord Theafurer depute A Schedule figned by him and us notarys publick under fubfcribing containing an Inventory and particular description of the faid REGALIA as follows **THE IMPERIAL CROWN OF SCOTLAND** Is of pure gold enriched with many precious ftones diamonds pearls and curious enamblings Its parts and specifick forms are thefe **PRIMO** Its compofed of a large broad circle or fillet which goes round the head adorned with twenty two large precious ftones viz. topazes amethyfts garnets emeraulds rubbies and hyacinths in collets of gold of various forms and with curious enamblings and betwixt each of thefe collets and ftones are interpofed great oriental pearls one of which is wanting **SECUNDO** Above the great circle there is another fmall one formed with twenty points adorned with the like number of diamonds and faphyrs alternatively and the points are topped with as many great pearls after which form are the coronets of our Lords Barons **TERTIO** The upper circle is relevat or hightened with ten croffes floree each being adorned in the center with a great diamond betwixt four great pearls placed in crofs X 1 and 1 but fome of the pearls are wanting and the number extant upon the upper part of the Crown befides what are in the under circle and in the crofs patee ar fifty one and thefe croffes floree are interchanged with other ten high flours de lis all alternative with the forefaid great pearls below which top the

points of the second finall circle. **NOTA** This is said to be the ancient form of the Crown of Scotland since the league made betwixt Achaius King of **SCOTS** and Charles the great of France the specifick form of our Crown differing from other Imperial Crowns in that it is hightened or raised with crosses floree alternatively with flours de lis The crown of France is hightened only with flours de lis and that of England with crosses patee alternatively with flours de lis Our Crown of Scotland since King James the sixth went to England has been ignorantly represented by herauld painters engravers and other tradesmen after the form of the crown of England with crosses patee whereas there is not one but that which tops the mond but all crosses floree such as we see on our old coins and these which top our old churches These crowns were not anciently arched or clofs Charles the eight of France is said to be the first in France who took a clofs crown as appears by his medals coined in the year one thousand four hundred and ninety-five being designed **IMPERATOR ORIENTIS** Edward the fifth in England in the year one thousand four hundred and eighty three carried a clofs Crown as is observed by Selden And our Crown is arched thus **QUARTO** From the upper circle proceed four arches adorned with enambled figures which meet and close at the top surmounted with a mond of gold or cœlestial glob enambled blew semee or powdered with stars crossed and enambled with a large cross patee adorned in the extremities with

a great pearl such a cross tops the Church of Holyrudehouse and cantoned with other four in the angles In the center of the cross patee there is a square amethyst which points the fore part of the crown and behind or on the other side is a great pearl And below it on the foot of the paler part of the cross are these characters J R 5 by which it appears King James the fifth was the first that closed the crown with arches and topped it with a mond and cross patee But it is evident primo That the money and medals coined in the reigns of King James the third and fourth have a close crown and it's no less clear that the arches of the Crown were not put there from the beginning or at the making of the Crown because primo they are tacked by tacks of gold to the ancient crown Secundo the workmanship of the arch is not so good, and there is a small distinction in the fineness betwixt the first and the last the latter being superfine Gold and the other not so exactly to that standard, whereof tryal has been made QUINTO The tire or bonnet of the Crown was of purple velvet but in the year J^m vi^c and eighty five it got a cap of crimson velvet adorned as before with four plates of gold richly wrought and inambléd And on each of them a great pearl half inch in diameter which appear between the four arches and the bonnet is turned up with ermine Upon the lowest circle of the crown immediately above the ermine there are eight small holes disposed two and two together on the four quarters of the crown in the middle space

betwixt the arches to which they have laced or tyed Diamonds or precious stones The crown is nine inches broad in diameter being twenty-sevin inches about and in hight from the under circle to the top of the cross patee six inches and an half It always stands on a square cushion of crimson velvot adorned with fringes and four tassels of gold threid hanging down at each corner **THE SCEPTER.** The stalk or stem of the scepter being silver double overgilt is two foot in length of hexagon form with three buttons or knops answering thereto Betwixt the first button and the second is the handle of hexagon form furling in the middle and plain Betwixt the second button and the third there are three sides engraven that under the Virgin Mary one of the statues that are on the top of the stalk is the letter J Upon the second side under Saint James the letter R and on the third under Saint Andrew the figure 5 The side betwixt J & R is engraven with fourteen flours de lis and on the side betwixt the figure 5 and the letter J are ten thistles continued from one stem from the third button to the capital the three sides under the statues are plain and on the other three are antique engravings viz. sacramental cups antique Medusa's heads and rullion foliages Upon the top of the stalk is an antique capital of leaves embossed upon the abacus whereof arises round the prolonged stem surrounded with three statues First that of the blessed Virgin crowned with an open crown holding in her right arm **OUR BLESSED SAVIOUR** and in her left hand a

mond enfigned with a cross Next to hir on her right hand stands the Statue of Saint Andrew in an apostolical garment and on his head a bonnet like a Scots bonnet holding in his right hand a cross or Saltire, a part whereof is broke off and in his left elevat a book open On the blessed Virgin's left hand Saint Andrew's right hand stands another statue seeming to represent Saint James with the like apostolical garment and a hanging neck superadded thereto And upon his head a little hat like to the Roman pilium In his right hand half elevat a book open and in his left a pastoral staff the head is broke off And above each statue being two inches and a half excepting the Virgin which is a little less the finishing of a Gothick niche Betwixt each statue arises a rullion in forme of a dolphine very distinct in length four inches foliage along the body their heads upward and effronted inward and the turning of their tails ending in a rose or cinquefoil outward Above these rullions and statues stands another hexagon button or knot with oak leaves under every corner and above it a crystall globe of two inches and a quarter diameter within three barrs jointed above where it is surmounted with six rullions and here again with an oval glob topped with an oriental pearl an half inch diameter The whole scepter in length is thirty four inches **THE SWORD** The sword is in length five foot The handle and pommel are of silver overgilt in length fifteen inches The pommel is round and somewhat flat on the two sides On the

middle of each there is of embossed work a garland and in the center there have been two enamelled plates which are broke off The traverse or cross of the sword being of silver overgilt is in length seventene inches and an half its form is like two Dolphins the heads joining and their tails end into accorns. The shell is hinging down towards the point of the sword formed like an escalop flourished or rather like a great oak leaf On the blade of the sword are indented with gold these letters JULIUS, II: P The Scabbard is of crimson velvet covered with silver gilded and wrought in filigree work into branches of the oak tree leaves and accorns On the scabbard are placed four round plates of silver overgilt two of them near to the crampit are enamelled blue and thereon in golden characters Julius II. Pon: Max: N. At the mouth of the scabbard opposite to the heck is a large square plate of silver enamelled purple in a cartouch azur an oak tree eradicated and fructuated or and above the cartouch the papal ensigne viz. Two keys in saltire adossee their bowels formed like roses or cinquefoils tyed with trappings and tassels hanging down at each side of the cartouche Above the keys is the papal tiar environed with three crowns with two labels turned up adorned with crosses. Pope Julius the second who gifted this sword to King James the fourth had for his armorial figures an oak tree fructuated which is the reason the sword is adorned with such figures A hill and a star Which figures I find not on any part of the sword If they

[have] been on the two enamelled plates which are lost off from the pommell I know not But its certain this pope had such figures as appears by those verses made by Voltoline a famous Italiane poet as the same are mentioned by Hermanus Hermes a German writer who gives us these lines found in the monastery Quercus mons stella formant tua stemmata princeps, hisque tribus trinum stat diadema tuum, Tuta navis petri medijs non flectitur undis, mons tegit a ventis stellaque monstrat iter AND thereafter UPON DELIVERY of the above Regalia to the said Lord Thesaurer depute and upon lodging thereof with the foresaid description of the same in an orderly manner in a chest within the said crown roome the said William Wilson as procurator for and in name and behalf of the said Earl Marischall and in the terms of his said procuratory PROTESTED that the delivering up of the regalia foresaid shall not invalidat or be prejudicial to the said Earl Marischall his heritable right of keeping thereof both in tyme of Parliament and intervals either in the said Earl his castle of Dunnotter as hitherto his ancestors have done or any where else within the Kingdom of Scotland that his Lordship and his Successors shall think secure and convenient As also in the terms of the act ratifying the Union betwixt this Kingdom of Scotland and the Kingdom of England whereby it is stipulated and agreed by both parliaments that the Crown Scepter and Sword of state shall be continued to be kept as they are at present within this Kingdom of Scotland and that they shall so

remain in all time coming notwithstanding of the union
PROTESTED That they shall remain within the said crown
roume of the castle of Edinburgh And in case the government
shall find the transportation thereof from Edinburgh castle to
any other secure place within this Kingdom at any time here-
after necessary **PROTESTED** also That the same may not
be done untill intimation be made to the said Earl Marischal
and his successors to the effect his Lordship or they may attend
and see them safely transported and securely lodged And
made due and lawful intimation of the premises to colonel
James Stewart deputy Governor of the said castle then pre-
sent that he might not pretend ignorance **AND ALSO** as

APPENDIX, N° II.

**A WARRANT FOR OPENING THE CROWN ROOM IN THE CASTLE
OF EDINBURGH. — 5 NOVEMBER 1794.**

GEORGE R.

WHEREAS it has been humbly represented to Us, That the Records of our ancient Kingdom of Scotland were formerly kept within our castle of Edinburgh in a room there known by the name of the Crown Room; That many of these Records were at different times removed from thence to other apartments more accessible and convenient, but that it is not certainly known whether all the Records kept within our said castle were so removed; That there is evidence of several Records of Royal Charters and others belonging to our said ancient kingdom having existed at the time when our Records were kept within our said castle, but which are not now among the other Records in our General Register House at Edinburgh; That this renders it proper to have the said Crown Room within our said castle of Edinburgh inspected in order to discover whether any

Records do still remain there; but that Room having now been for a long period unopened, it is thought necessary, that our Royal Warrant should be issued for opening and inspecting the same, We do therefore hereby grant warrant to and authorize our right trusty and right entirely beloved cousin Henry Duke of Buccleugh Knight of the most noble order of the Garter, Lord Lieutenant of our county of Mid Lothian, or our Lord Lieutenant for the said county for the time being, our right trusty and right entirely beloved cousin Alexander Duke of Gordon Keeper of our Great Seal or our Keeper of the Great Seal for the time being, our right trusty and well beloved Councillor James Stewart Mackenzie Keeper of our Privy Seal, or the Keeper of our Privy Seal for the time being, our right trusty and well beloved Councillor Frederick Campbell (commonly called Lord Frederick Campbell) Lord Clerk Register, or our Clerk Register for the time being, our right trusty and well beloved Councillor Henry Dundas Keeper of our Signet, or the Keeper of the Signet for the time being, our trusty and well beloved General Adam Gordon (commonly called Lord Adam Gordon) Commander in Chief of our Forces in Scotland, or our Commander in Chief for the time being, our right trusty and right well beloved cousin Archibald Earl of Eglintoun, Governor of our said castle of Edinburgh, or our Governor thereof for the time being, the Lieutenant Governor of the said castle for the time being; our right trusty and well beloved Thomas

Elder Esq. Lord Provost of Edinburgh, or the Lord Provost of Edinburgh for the time being, Ilay Campbell of Succoth, Esq. Lord President of the Court of Session, or the Lord President for the time being, James Montgomery of Stenhope Esq. Lord Chief Baron of our Court of Exchequer, or our Lord Chief Baron for the time being, Robert M^cQueen of Braxfield Esq. our Justice Clerk, or our Justice Clerk for the time being, Robert Dundas of Arnifton Esq. our Advocate, or our Advocate for the time being, and Robert Blair Esq. our Solicitor General, or our Solicitor General for the time being, or any three of them to open and inspect the said Crown Room within our said castle of Edinburgh, and the same being so opened we do hereby order and direct an exact account of the state of the said Room to be drawn up in writing together with a particular Inventory of such Records or Papers as shall be found therein. Given at our Court at Saint James's the 5th day of November 1794 in the thirty-fifth year of our Reign.

By His Majesty's Command,

PORTLAND.

II. REPORT BY THE COMMISSIONERS FOR OPENING THE CROWN ROOM IN THE CASTLE OF EDINBURGH.—22 DECEMBER, 1794.

WITHIN the Lord Clerk Register's Office in the General Register House at Edinburgh, on Monday the twenty-second day of December in the year Seventeen hundred and ninety-four, between the hours of ten and eleven before noon, convened as Commissioners after mentioned, in consequence of a letter of intimation from his Majesty's Advocate, the following noblemen, Officers of State, and gentlemen, viz. His Grace the Duke of Buccleugh, Lord Lieutenant of the county of Mid Lothian; the Right Honourable Lord Adam Gordon, Commander in Chief in Scotland; Colonel Hugh Montgomery, Lieutenant Governor of the Castle of Edinburgh; the Right Honourable Sir James Stirling, Baronet, Lord Provost of the city of Edinburgh; the Right Honourable Hay Campbell, Lord President of the Court of Session; the Right Honourable James Montgomery, Lord Chief Baron of the Court of Exchequer; the Right Honourable Robert M'Queen, Lord Justice Clerk; the Right Honourable Robert Dundas, his Majesty's Advocate; and Robert Blair, Esq. his Majesty's Solicitor General for Scotland; to whom the Lord Advocate presented and read a warrant superscribed by his Majesty, subscribed by the Duke of Port-

land, one of his Majesty's principal Secretaries of State, and sealed with his Majesty's cachet, dated at S' James's the fifth of November in the year one thousand seven hundred and ninety-four, intituled at the bottom of its first page and on its back, "Warrant for opening Crown Room in the Castle of Edinburgh;" of the following tenor, viz.

[Here follows the Warrant.]

WHICH commiffion having been read, and ordered by the Commiffioners prefent to be lodged in the General Register Houfe for prefervation, the faid Commiffioners, in humble obedience to his Majesty's commands, refolved immediately to put the fame in execution, by proceeding to the caſtle, attended by M' William Robertson, one of the Lord Register's Deputies for keeping the Records; M' Hugh Warrander, Crown Agent in Scotland; John Young, his Majesty's wright; Andrew Wilfon, his Majesty's blackfmith; and Robert Wilfon, his Majesty's mafon; and having accordingly done fo, they found the Crown Room, which was pointed out to them by the Deputy Governor of the caſtle, fecured by a ſtrong outer door of oak wood and two ſtrong locks, the keys of which were not to be found; and the only window of the faid room barricadoed on the outside by crofs bars of iron, and a wooden frame within: They then gave orders to the tradefmen above named to force open the locks of the wooden door; which being done, they found another door

within it made of strong iron bars, and secured by a padlock, which it was necessary to force open, as the key was not to be found. The Commissioners having then entered the room and caused the wooden frame of the window, which was much decayed, to be taken down, they had an opportunity of surveying attentively the whole room and what was contained in it, and they humbly report the state of it to be as follows :

The pavement walls and ceiling are all of stone, arched both above and below, with a vent and fire-place; and upon examining the said vent, it was found to be likewise secured by strong iron bars across, near the level of the floor of the room above.

In the room itself they found no papers, presses, repositories, or articles of any kind; except that at the end of the room opposite to the window, they observed a large chest made of oak wood, fastened by two iron locks, of which no keys were to be found; and as the Commissioners had no reason to suppose that the said chest contained any papers or records, though probably it might contain the regalia of Scotland, they were doubtful of the propriety of causing the same to be forced open; and therefore have in the mean time left it shut as before, till his Majesty's farther pleasure be known.

The said chest, upon being measured, was found to be six foot and three inches long, two foot and six inches and half an inch wide, and two foot and six inches and half an inch deep: The room measures two and twenty foot four inches in length, and eighteen foot eight inches in breadth; the side walls are five foot three inches high from the floor to the spring of the arch, and the centre of the arch is eleven foot three inches above the floor.

This room is situated in the centre of the east side of the square of the castle; the entry to which is by a turnpike stair, which gives access to several other apartments for the accommodation of the garrison: The window of the said crown room looks westward into the square of the castle, and the sole of it is about thirteen foot above the level of the pavement of the square.

The grounds upon which the Commissioners think it probable that the said chest contains the regalia of Scotland are these:

The 24th article of the Treaty of Union bears, *inter alia*, “that the Crown, Sceptre, and Sword of State continue to be kept as they are, within that part of the United Kingdom now called Scotland, and that they shall so remain in all times coming, notwithstanding the union”: And there was produced

to the Commissioners, by the Lord Clerk Register's Deputies for keeping the records, a publick and solemn instrument, of which an authentick copy is herewith transmitted, bearing date within the castle of Edinburgh, on the twenty-sixth of March, in the year one thousand seven hundred and seven; and which instrument in substance states, that the said regalia were lodged in the crown room, having been delivered by the Deputy of the then Earl Marischal, in presence of the Lord Treasurer Depute, for the purpose of being lodged in the said crown room; which from the instrument appears to have been done accordingly.

The Commissioners having thus ascertained the state of the said crown-room, and having left the chest unopened, as before mentioned, they caused the window and the two doors to be again secured in their presence in manner following, viz. 1st, by nailing up new wooden boards within the iron bars of the windows; and 2dly, by procuring two new padlocks to the inner iron door, both of which they saw locked, and one of them labelled and sealed with his grace the duke of Buccleugh's seal; and a new lock to the other door, which they also saw locked; and the keys of all the three locks having been brought away by them, are inclosed in a paper parcel, sealed by the Lord President's and Lord Advocate's seals, labelled on the back, of the date hereof as follows: " Keys of
" the Crown-room in the Castle of Edinburgh sealed up in

“ this paper ;” which paper, with its contents, are left in the General Register-house, under the care of the Lord Clerk Register’s Deputies, till his Majesty’s further pleasure be known : the old padlock by which the inner iron door was secured, is left within the crown-room upon the top of the chest.

The Commissioners have desired that one duplicate of this report may be transmitted by the Lord Advocate to the Lord Clerk Register, now in London, to be delivered by him to his Majesty’s Secretary of State for the Home Department ; and that another shall be lodged in the General Register-house, along with the original warrant ; both duplicates being signed by a quorum of the Commissioners.
